

## DISINFECTION and SANITATION SERVICES

Specific procedures to destroy harmful microorganisms are imperative during this pandemic time.

Basic cleaning procedures are not effective enough to fully disinfect large areas and hidden corners. This can considerably increase the labour cost, since more workers are required to complete this every day task.

New technologies are now available which are effective at killing pathogens such as **COVID19** upon contact with the added benefit of providing continual protection over an extended period of time. Powerful botanical disinfectants can be applied to large areas at a faster rate than other methods, reducing labour time.

Preventive disinfection is one step ahead in the fight against **COVID19** or any other type of lethal virus. **Capitol** provides advanced technical procedures to eliminate all type of bacteria as well preventive disinfection services, supported by the latest technology in the field.

This is the time to work together to create a safe environment for everyone in the work place, home, transportation and public places.

## ELECTROSTATIC DISINFECTION

Top of the line technology for offices and sensitive environments. Ideal to cover large areas in less time with excellent results.

Electrostatic disinfection use an electrical charge to allow the appropriate sanitizers and disinfectants to wrap around and evenly coat all types of surfaces for a more complete disinfection.

**Capitol** uses environmental safe disinfectants approved by Health Canada as an effective treatment to eliminate COVID19

**Capitol** has the technology and the right procedures to help during these difficult times.
